Developments in Theoretical Computer Science J. Dassow,1994-10-07 **Current Trends in Theoretical Computer Science** Grzegorz Rozenberg,Arto Salomaa,1993 The book is a very up to date collection of articles in theoretical computer science written by leading authorities in the field The topics range from algorithms and complexity to algebraic specifications and from formal languages and language theoretic modeling to computational geometry The material is based on columns and articles that have appeared in the EATCS Bulletin during the past two to three years Although very recent research is discussed the largely informal style of writing makes the book accessible to readers with little or no previous knowledge of the topics **Current Trends In Theoretical Computer Science: The Challenge Of The New Century; Vol 1: Algorithms And Complexity; Vol 2: Formal Models And Semantics** Grzegorz Rozenberg,Arto Salomaa,Gheorghe Paun,2004-04-19 This book is based on columns and tutorials published in the Bulletin of the European Association for Theoretical Computer Science EATCS during the period 2000 2003 It presents many of the most active current research lines in theoretical computer science The material appears in two volumes Algorithms and Complexity and Formal Models and Semantics reflecting the traditional division of the field The list of contributors includes many of the well known researchers in theoretical computer science Most of the articles are reader friendly and do not presuppose much knowledge of the area in question Therefore the book constitutes very suitable supplementary reading material for various courses and seminars in computer science **Developments in Theoretical Computer Science** ,1994 **Current Trends in Theoretical Computer Science** Gheorghe P?un,Grzegorz Rozenberg,Arto Salomaa,2004 contents vol 1 Algorithms Computational Complexity Distributed Computing Natural Computing **Current Trends in Theoretical Computer Science** Gheorghe Paeau,Grzegorz Rozenberg,Arto Salomaa,2004 contents vol 1 Algorithms Computational Complexity Distributed Computing Natural Computing **Results and Trends in Theoretical Computer Science** Juliani Karhumäki,Hermann Maurer,1994-05-26 This volume is dedicated to Professor Arto Salomaa on the occasion of his 60th birthday The 32 invited papers contained in the volume were presented at the festive colloquium organized by Hermann Maurer at Graz Austria in June 1994 the contributing authors are well known scientists with special relations to Professor Salomaa as friends Ph D students or co authors The volume reflects the broad spectrum of Professor Salomaa s research interests in theoretical computer science and mathematics with contributions particularly to automata theory formal language theory mathematical logic computability and cryptography The appendix presents Professor Salomaa s curriculum vitae and lists the more than 300 papers and 9 books he published *The Making of a New Science* Giorgio Ausiello,2018-08-06 This book explains the development of theoretical computer science in its early stages specifically from 1965 to 1990 The author is among the pioneers of theoretical computer science and he guides the reader through the early stages of development of this new discipline He explains the origins of the field arising from disciplines such as logic mathematics and electronics and he

describes the evolution of the key principles of computing in strands such as computability algorithms and programming But mainly it s a story about people pioneers with diverse backgrounds and characters came together to overcome philosophical and institutional challenges and build a community They collaborated on research efforts they established schools and conferences they developed the first related university courses they taught generations of future researchers and practitioners and they set up the key publications to communicate and archive their knowledge The book is a fascinating insight into the field as it existed and evolved it will be valuable reading for anyone interested in the history of computing

Observations about the Development of Theoretical Computer Science Juris Hartmanis,1980 This paper gives a personal account of some developments in automata theory and computational complexity theory Though the account is subjective and deals primarily with the research areas of direct interest to the author it discusses the underlying beliefs and philosophy which guided this research as well as the intellectual environment and the ideas and contacts which influenced it An attempt is also made to draw some general conclusions about computer science research and to discuss the nature of theoretical computer science
