

Rational Approximation

If α is any number and m and n are integers, then there is a rational number m/n for which

$$\left| \alpha - \frac{m}{n} \right| \leq \frac{1}{n^2}. \quad (1)$$

If α is irrational and k is any whole number, there is a fraction m/n with $n \leq k$ and for which

$$\left| \alpha - \frac{m}{n} \right| \leq \frac{1}{nk}. \quad (2)$$

Furthermore, there are an infinite number of fractions m/n for which

$$\left| \alpha - \frac{m}{n} \right| \leq \frac{1}{n^2}. \quad (3)$$

Approximation With Rational Functions:

Approximation with Rational Functions Donald J. Newman, 1979-12-31 This series of lectures treats certain amusing and interesting aspects of rational function approximations striving for variety and diversity rather than depth or thoroughness Graduate students and faculty knowledgeable in the elements of real and complex analysis should gain insight into recent developments in the field Interpolation and Approximation by Rational Functions in the Complex Domain J. L. Walsh, 1935-12-31 The present work is restricted to the representation of functions in the complex domain particularly analytic functions by sequences of polynomials or of more general rational functions whose poles are preassigned the sequences being defined either by interpolation or by extremal properties i e best approximation Taylor s series plays a central role in this entire study for it has properties of both interpolation and best approximation and serves as a guide throughout the whole treatise Indeed almost every result given on the representation of functions is concerned with a generalization either of Taylor s series or of some property of Taylor s series the title *Generalizations of Taylor s Series* would be appropriate *Pad and Rational Approximation* E.B. Safe, 2013-05-09 *Pad and Rational Approximation Theory and Applications* presents the proceedings of the Conference on Rational Approximation with Emphasis on Applications of Pad Approximants held in Tampa Florida on December 15 17 1976 The contributors focus on the interplay of theory computation and physical applications This book is composed of six parts encompassing 44 chapters The introductory part discusses the general theory of orthogonal polynomials that is the mathematical basis of Pad approximants and related matters evaluation This text also examines the connection between approximants on a stepline in the ordinary Pad table and certain continued fractions and the convergence of diagonal Pad approximants to a class of functions with an even number of branch points The following parts deal with the special functions and continued fractions of Pad approximation and the theory of rational approximations These parts also investigate the geometric convergence of Chebyshev rational approximation on the half line the optimal approximation by Almost Classical interpolation and the incomplete polynomials approximation The discussion then shifts to the physical applications and computations of the Pad approximants The concluding part presents the applications of rational approximation to gun fire control and to the White Sands Missile Range Computer Facility This part also provides a list of some open problems and conjectures concerning polynomials and rational functions This book is of great benefit to mathematicians physicists and laboratory workers **Approximation of Functions** G. G. Lorentz, 2005 This is an easily accessible book on the approximation of functions simple and without unnecessary details but complete enough to include the main results of the theory Except for a few sections only functions of a real variable are treated This work can be used as a textbook for graduate or advanced undergraduate courses or for self study Included in the volume are Notes at the end of each chapter Problems and a selected Bibliography **Rational Approximation of Real Functions** P. P. Petrushev, Vasil Atanasov Popov, 2011-03-03 This 1987 book examines the approximation of real functions by real rational

functions These are a more convenient tool than polynomials and interest in them was growing especially after D Newman s work in the mid sixties The authors present the basic achievements of the subject and also discuss some topics from complex rational approximation **Rational Approximation and Interpolation** P.R. Graves-Morris,E.B. Saff,R.S. Varga,2006-11-14

On Approximation by Rational Functions and by Bounded Analytic Functions J. L. Walsh,1955 **A Note on Rational Function Approximation** H. L. Loeb,GENERAL DYNAMICS/ASTRONAUTICS SAN DIEGO CALIF.,1959 The purpose of this note is two fold The first objective is to describe a weighted least squares algorithm for rational function approximation The second objective is to exhibit some examples of functions approximated by rational functions in one or more variables Author

Rational Approximation of Real Functions P P Petrushev,Vasil Atanasov Popov,2014-05-14 Originally published in 1987 this book is devoted to the approximation of real functions by real rational functions These are in many ways a more convenient tool than polynomials and interest in them was growing especially since D Newman s work in the mid sixties The authors aim at presenting the basic achievements of the subject and for completeness also discuss some topics from complex rational approximation Certain classical and modern results from linear approximation theory and spline approximation are also included for comparative purposes This book will be of value to anyone with an interest in approximation theory and numerical analysis Rational Approximation and its Applications in Mathematics and Physics Jacek Gilewicz,Maciej

Pindor,Wojciech Siemaszko,2006-11-15 *Approximation with Rational Functions Rational Functions* Conference Board of the Mathematical Sciences,1979 **Uniform Approximation by Rational Functions Having Restricted Denominators**

G. D. Taylor,E. H Kaufman (Jr),COLORADO STATE UNIV FORT COLLINS DEPT OF MATHEMATICS.,1979 This paper considers approximation of continuous functions on a compact metric space by generalized rational functions for which the denominators have bounded coefficients and are bounded below by a fixed positive function This lower bound alleviates numerical difficulties and in some applications e g digital filter design has a useful physical interpretation A zero in the convex hull characterization of best approximations is developed and used to prove uniqueness and de la Vallee Poussin results Examples are given to illustrate this theory and its differences with the standard theory where the denominators are merely required to be positive A modified differential correction algorithm is presented and is proved to always converge at least linearly and often quadratically Author **Rational Approximation and Its Applications in Mathematics and**

Physics Jacek Gilewicz,Maciej Pindor,Wojciech Siemaszko,1987 Rational Approximations Garry R. Jackson,1964 This thesis is concerned with approximation by rational functions Basic Chebyshev concepts regarding polynomial approximation are reviewed Theorems concerning the approximation of a continuous function by a rational function are presented along with proofs Then basic Chebyshev concepts are employed in an attempt to outline a constructive theory of approximation by rational functions Some algorithms for obtaining rational interpolatory functions and rational approximations have been included **Best Approximation to Some Rational Functions** Stanley Joseph Poreda,1970 Shape Preserving

A. Thisted,2017-10-19

Statistics and computing share many close relationships Computing now permeates every aspect of statistics from pure description to the development of statistical theory At the same time the computational methods used in statistical work span much of computer science Elements of Statistical Computing covers the broad usage of computing in statistics It provides a comprehensive account of the most important computational statistics Included are discussions of numerical analysis numerical integration and smoothing The author give special attention to floating point standards and numerical analysis iterative methods for both linear and nonlinear equation such as Gauss Seidel method and successive over relaxation and computational methods for missing data such as the EM algorithm Also covered are new areas of interest such as the Kalman filter projection pursuit methods density estimation and other computer intensive techniques **Uniform Approximation by Rational Functions** Lynn Arthur Steen,1965
