*Ordered Algebraic Structures* Jorge Martínez, W.C. Holland, 1993-04-30 The 1991 Conrad Conference

*Ordered Algebraic Structures* W. B. Powell, 1985-10-01 The papers contained in this volume constitute the proceedings of the Special Session on Ordered Algebraic Structures which was held at the 1982 annual meeting of the American Mathematical Society in Cincinnati Ohio The Special Session and this volume honor Paul Conrad whose work on the subject is noted for its depth and originality These papers address many areas within the subject of ordered algebraic structures including varieties free algebras lattice ordered groups subgroups of ordered groups semigroups ordered rings and topological properties of these structures

*An Introduction to Algebraic Structures* Joseph Landin, 1989-01-01 As the author notes in the preface The purpose of this book is to acquaint a broad spectrum of students with what is today known as abstract algebra Written for a one semester course this self contained text includes numerous examples designed to base the definitions and theorems on experience to illustrate the theory with concrete examples in familiar contexts and to give the student extensive computational practice The first three chapters progress in a relatively leisurely fashion and include abundant detail to make them as comprehensible as possible Chapter One provides a short course in sets and numbers for students lacking those prerequisites rendering the book largely self contained While Chapters Four and Five are more challenging they are well within the reach of the serious student The exercises have been carefully chosen for maximum usefulness Some are formal and manipulative illustrating the theory and helping to develop computational skills Others constitute an integral part of the theory by asking the student to supply proofs or parts of proofs omitted from the text Still others stretch mathematical imaginations by calling for both conjectures and proofs Taken together text and exercises comprise an excellent introduction to the power and elegance of abstract algebra Now available in this inexpensive edition

the book is accessible to a wide range of students who will find it an exceptionally valuable resource Unabridged corrected Dover 1989 republication of the edition published by Allyn and Bacon Boston 1969 *From Algebraic Structures to Tensors* Gérard Favier,2020-01-02 Nowadays tensors play a central role for the representation mining analysis and fusion of multidimensional multimodal and heterogeneous big data in numerous fields This set on Matrices and Tensors in Signal Processing aims at giving a self contained and comprehensive presentation of various concepts and methods starting from fundamental algebraic structures to advanced tensor based applications including recently developed tensor models and efficient algorithms for dimensionality reduction and parameter estimation Although its title suggests an orientation towards signal processing the results presented in this set will also be of use to readers interested in other disciplines This first book provides an introduction to matrices and tensors of higher order based on the structures of vector space and tensor space Some standard algebraic structures are first described with a focus on the hilbertian approach for signal representation and function approximation based on Fourier series and orthogonal polynomial series Matrices and hypermatrices associated with linear bilinear and multilinear maps are more particularly studied Some basic results are presented for block matrices The notions of decomposition rank eigenvalue singular value and unfolding of a tensor are introduced by emphasizing similarities and differences between matrices and tensors of higher order *Neutrosophic Algebraic Structures and Their Applications* Florentin Smarandache,Memet Şahin,Derya Bakbak,Vakkas Uluçay,Abdullah Kargın ,2022-08-01 Neutrosophic theory and its applications have been expanding in all directions at an astonishing rate especially after of the introduction the journal entitled Neutrosophic Sets and Systems New theories techniques algorithms have been rapidly developed One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set bipolar set soft set hesitant fuzzy set etc The different hybrid structures such as rough neutrosophic set single valued neutrosophic rough set bipolar neutrosophic set single valued neutrosophic hesitant fuzzy set etc are proposed in the literature in a short period of time Neutrosophic set has been an important tool in the application of various areas such as data mining decision making e learning engineering medicine social science and some more **New Development of Neutrosophic Probability, Neutrosophic Statistics, Neutrosophic Algebraic Structures, and Neutrosophic Plithogenic Optimizations** Florentin Smarandache,Yanhui Guo,2022-09-01 This volume presents state of the art papers on new topics related to neutrosophic theories such as neutrosophic algebraic structures neutrosophic triplet algebraic structures neutrosophic extended triplet algebraic structures neutrosophic algebraic hyperstructures neutrosophic triplet algebraic hyperstructures neutrosophic n ary algebraic structures neutrosophic n ary algebraic hyperstructures refined neutrosophic algebraic structures refined neutrosophic algebraic hyperstructures quadruple neutrosophic algebraic structures refined quadruple neutrosophic algebraic structures neutrosophic image processing neutrosophic image classification neutrosophic computer vision neutrosophic machine learning neutrosophic artificial intelligence neutrosophic
