**Cognitive Carpentry** John L. Pollock, 1995 A sequel to the author's How to Build a Person this work builds upon that theoretical groundwork for the implementation of rationality through artificial intelligence It argues that progress in AI has stalled because of its creators reliance upon unformulated intuitions about rationality Instead the author bases the OSCAR architecture upon an explicit philosophical theory of rationality encompassing principles of practical cognition epistemic cognition and defeasible reasoning One of the results is the first automated defeasible reasoner capable of reasoning in a rich logical environment [The Logic of Legal Requirements](#) Jordi Ferrer Beltrán, Giovanni Battista Ratti, 2012-09-13 Does the

Pollock, Joseph Cruz, 1999-03-18 This exciting new edition of the classic Contemporary Theories of Knowledge has been significantly updated to include analyses of the recent literature in epistemology In addition a new case is made for the strong connection between epistemology and artificial intelligence as Pollock and Cruz argue that a necessary condition for the correctness of any epistemological theory is that it be possible to build an implemented artificial intelligence system on the basis of it Like the first edition Contemporary Theories of Knowledge Second Edition is an excellent teaching tool introducing the reader to the fundamental issues and approaches in the field of epistemology **Perspectives on the**

Frames of Reference and Direct Manipulation Based Navigation Asaf Friedman, 2005 The analysis showed that the lack of realism of these systems means that they do not offer a sense of reality because of the user's inability to interact easily with the computer to navigate among represented objects The user cannot 1 Plan a course from a given location to a desired one 2 Shift the direction of their gaze and focus attention to objects as they move across a path 3 Move around an object keeping track of this change in relation to the surrounding objects 4 Turn an object in front of the viewer in order to examine it This lack of sense of reality cannot be simply improved by adding attributed to the system that are more realistic details shadows and reflections
