Initially, there is a detailed description of clinical method. Next, there is an outline of the common conditions that may occur in relation to each system. The final section of each chapter contains a description of clinical findings and the conditions in which they occur. The approach taken by this book is a description of the findings that may occur at each step of the clinical encounter. The last chapter discusses communication and ethics. This chapter begins with an analysis of the way in which candidates are assessed at examinations. It then analyses communication and ethics and describes a method of communication. An appendix is included which gives a summary of history taking and examination techniques for each system.
