G. Vitzthum, 2008-04-15 Coffee one of the most commercially important crops grown is distributed and traded globally in a multi million dollar world industry This exciting new book brings together in one volume the most important recent developments affecting the crop Contributions from around 20 internationally respected coffee scientists and technologists from around the world provide a vast wealth of new information in the subject areas in which they are expert The book commences with three cutting edge chapters covering non volatile and volatile compounds that determine the flavour of coffee Chapters covering technology follow including comprehensive information on developments in roasting techniques decaffeination the science and technology of instant coffee and home catering beverage preparation The physiological effects of coffee drinking are considered in a fascinating chapter on coffee and health Agronomic aspects of coffee breeding and growing are covered specifically in chapters concentrating on these aspects particularly focussing on newly emerging molecular and cellular techniques Finally recent activities of some international organisations are reviewed in a lengthy appendix The editors of *Coffee Recent Developments* have drawn together a comprehensive and extremely important book that should be on the shelves of all those involved in coffee The book is a vital tool for food scientists food technologists and agricultural scientists and the commercially important information included in the book makes it a must have reference to all food companies involved with coffee All libraries in universities and research stations where any aspect of the coffee crop is studied or taught should have copies of the book available R J Clarke also co editor of the widely acclaimed six volume work *Coffee* published between 1985 and 1988 is a consultant based in Chichester U K O G Vitzthum formerly Director of Coffee Chemistry Research worldwide at Kraft Jacobs Suchard in Bremen Germany is Honorary Professor at the Technical University of Braunschweig Germany and Scientific Secretary of the Association Scientifique Internationale du Cafe ASIC in Paris France *Coffee, Cacao and Rubber Technical Services*, *Coffee* R. J. Clarke, 2012-12-06 The present volume Volume 2 in this planned series on coffee deals with processing and follows on naturally from the first volume on the chemistry of coffee which described its numerous constituents in the green raw and various product forms We have already remarked that coffee

has great compositional complexity and this complexity of understanding extends when we come to that is the many processes involved in the roasting consider its processing of green coffee and its subsequent conversion into a consumable brew especially through extraction and drying into an instant coffee The simple brewing of roasted and ground coffee with water in the home also possesses considerable mystique and needs know how for optimal results The choice of green coffees from an almost bewildering array of different types available through species variety differences and different methods of processing from the coffee cherry to the green coffee bean needs understanding and guidance Furthermore various forms of pre treatment of green coffee before roasting are available Some of these are little known but others such as decaffeination for those who desire roasted or instant coffee with little or no caffeine are now becoming well established Finally both the processing of coffee cherries to coffee beans leaving a range of different waste products pulp hulls husk parchment etc and of roasted coffee after industrial aqueous extraction leaving spent coffee grounds provide waste products that have found considerable commercial value in different ways
