Larson,1981 **Proceedings of the 1990 ACM SIGMOD International Conference on Management of Data** Hector Garcia-Molina,H. V. Jagadish,1990 The proceedings of a conference on the management of data The book contains 37 selected papers and summaries of panel discussions and video presentations covering new ideas in database technology Computer Hardware Description Languages and Their Applications John A. Darringer,F. J. Rammig,1990 Languages for precisely describing the behavior of computers have been studied since the conception of the computer itself As the computer industry has grown so has the need to exchange information about computers Computer Hardware Description Languages CHDL are required to provide specifications and detailed implementation for a growing menu of sophisticated design automation tools including synthesis verification simulation analysis optimization placement wiring and testing communicate requirements and capabilities between suppliers and users of computer components and subsystems facilitate the transfer of new methods and results within the university and industrial research community As reflected in this

book there is an increased emphasis on applications and resulting requirements that are placed on CHDLs In the field of synthesis a major application area there is today a focus on high level synthesis and synthesis under design constraints In the area of design correctness research has shifted away from simulation to formal verification techniques such as temporal logic

26th Structures, Structural Dynamics, and Materials Conference: Structural, materials and design engineering ,1985 **Algebras for Object-oriented Query Languages** Scott L. Vandenberg,1993 Abstract Algebraic query processing and optimization for relational databases is a proven and reasonably well understood technology This thesis presents a data model and query language that were developed in part to facilitate the study of algebraic query processing and optimization for advanced data models It also continues the evolution of the algebraic paradigm by presenting operators and transformation rules that correspond to this data model and thus extend the paradigm in several directions Additional research into algebraic constructs is also presented this work was done in the context of a newer system that provides even more features than the previous one A comprehensive survey of database algebras is included to help place the work in perspective **A Study on Conceptual Data Modeling** Eva Lindencrona-Ohlin,1979 **Beginning Database Design** Gavin Powell,2006 From the 1 source for computing information trusted by more than six million readers worldwide
