Rockswold,Margaret L. Lial,1999-08-09 This book intended for a graphing required college algebra and trigonometry or precalculus course offers an innovative approach by demonstrating the importance of mathematics to students and presenting the material in an accessible manner The text consistently integrates mathematical concepts with real applications in order to enhance student intuition and understanding Symbolic algebraic graphical numerical and verbal skills are continually reinforced throughout When introducing mathematical ideas the text moves from the concrete to the abstract rather than the reverse It is the authors philosophy that learning is increased when students can relate a concept to something in their lives Hence mathematical concepts are often introduced through applications that help make the mathematics real to students Students see the importance of a topic from a practical and intuitive point of view with models and applications playing a central part in the learning process Algebra and Trigonometry with Modeling and Visualization Plus MyMathLab with Pearson EText -- Title-Specific Access Card Package Gary K.
