**EFFECTIVE TEACHING AND LEARNING** Paul Cooper, Donald McIntyre, 1996-02-16 This book examines how teachers and students actually go about their classroom business It carefully avoids the assumptions of policy makers and theorists about what ought to be happening and focuses on what is happening In doing so Cooper and McIntyre offer a detailed look at how teachers are responding to the National Curriculum a unique insight into secondary school students as learners a grounded analysis of teaching and learning strategies drawing on the psychological theories of Bruner and Vygotsky The book follows on from Donald McIntyre s previous book Making Sense of Teaching and will be of interest to student teachers teachers studying for advanced degrees and academics involved in teacher education      Transforming Teaching and Learning with Active and Dramatic Approaches Brian Edmiston, 2013-09-11 A CHOICE Outstanding Academic Title 2014 How can teachers transform classroom teaching and learning by making pedagogy more socially and culturally responsive more relevant to students lives and more collaborative How can they engage disaffected students in learning and at the same time promote deep understanding through high quality teaching that goes beyond test preparation This text for prospective and practicing teachers introduces engaging innovative pedagogy for putting active and dramatic approaches to learning and teaching into action Written in an accessible conversational and refreshingly honest style by a teacher and professor with over 30 years experience it features real examples of preschool elementary middle and high school teachers working in actual classrooms in diverse settings Their tales explore not only how but also why they have changed the way they teach Photographs and stories of their classroom practice along with summarizing charts of principles and strategies both illuminate the critical cross curricular and inquiry based conceptual framework Edmiston develops and provide rich examples and straightforward guidelines that can support readers as they experiment with using active and dramatic approaches to dialogue inquiry building community planning for exploration and authentic assessment in their own classrooms      **Classroom Discourse and the Space of Learning** Ference Marton, Amy B.M. Tsui, Pakey P.M. Chik, Po Yuk Ko, Mun Ling Lo, 2004-05-20 Classroom Discourse and the Space of Learning is about learning in schools and the central role of language in learning The investigations of learning it reports are based on two premises First whatever you are trying to learn there are certain necessary conditions for succeeding although you cannot be sure that learning will take place when those conditions are met you can be sure that no learning will occur if they are not The limits of what is possible to learn is what the authors call the space of learning Second language plays a central role in learning it does not merely convey meaning it also creates meaning The book explicates the necessary conditions for successful learning and employs investigations of classroom discourse data to demonstrate how the space of learning is linguistically constituted in the classroom Classroom Discourse and the Space of Learning makes the case that an understanding of how the space of learning is linguistically constituted in the classroom is best achieved through investigating classroom discourse and that finding out what the conditions are for successful learning

and bringing them about should be the teacher's primary professional task. Thus it is fundamentally important for teachers and student teachers to be given opportunities to observe different teachers teaching the same thing and to analyze and reflect on whether the classroom discourse in which they are engaged maximizes or minimizes the conditions for learning. It is both more culturally situated and more generalizable than many other studies of learning in schools. Each case of classroom teaching clearly demonstrates how the specific language culture and pedagogy molds what is happening in the classroom, yet at the same time it is possible to generalize from these culturally specific examples the necessary conditions that must be met for the development of any specific capability, regardless of where the learning is taking place and what other conditions might be present. This book encompasses both theory and practice, providing a detailed explication of the theory of learning underlying the analyses of classroom teaching reported along with close analyses of a number of authentic cases of classroom teaching driven by classroom discourse data which have practical relevance for teachers. Intended for researchers and graduate students in education, teacher educators, and student teachers, *Classroom Discourse and the Space of Learning* is practice and content oriented, theoretical, qualitative, empirical, and focused on language and links teaching and learning in significant new ways.

**When Teaching Becomes Learning** Eric Sotelo, 1991-01-01 *Five Standards for Effective Teaching* Stephanie Stoll Dalton, 2007-11-02 An acclaimed research-based framework for promoting excellence. Based on a proven instructional model distilled over years of research, this book focuses on five essential pedagogy standards for guiding teaching practice in classrooms with diverse students, including English learners. Providing key indicators for each standard along with the theoretical rationale and best practice strategies, the book offers teachers invaluable guidance for enhancing language literacy, thinking, and content learning across the curricula. It also provides advice on creating classroom groupings for differentiating lessons and activities and includes extensive examples of practices from real-life classrooms. Stephanie Stoll Dalton, Ed.D., has taught diverse students from first to twelfth grade, community college, and as a teacher educator. She has consulted widely on teacher quality. She is currently with the U.S. Department of Education.

**Teacher Rounds** Thomas Del Prete, 2013-05-23 *Teacher Rounds* Powerful peer-to-peer teacher professional development.
