Aguilar,2013 Considers the plausibility of alien life and what creatures living on extrasolar planets might be like drawing on scientific sources to depict alien creatures who have adapted to the unique characteristics of their respective environments *Alien Worlds* Reuben Stone,1993 Quality and Content Joseph Levine,2018-03-09 Joseph Levine draws together a series of essays in which he has developed his distinctive approach to philosophy of mind He explores such topics as the phenomenal concept strategy to defend materialism from anti materialist intuitions the doctrine of representationalism about phenomenal character the modal argument against materialism the nature of demonstrative thought and cognitive phenomenology Levine argues that the phenomenal concept strategy cannot work and that representationalism has certain fatal flaws at least if it is to be joined to a materialist metaphysics On the other hand he defends materialism from the modal argument contending that it relies on a questionable conflation of semantic and metaphysical issues Levine also provides a naturalistic theory of demonstrative thought criticizing certain philosophical arguments involving that notion in the process All of the essays in some way respond to various materialist attempts to close the explanatory gap as well as outline a different conception of conscious experience that would accommodate the gap Levine connects his work with related themes in contemporary psychology and with such hot philosophical topics as

cognitive phenomenology      **Light of the Stars** Adam Frank,2018-06-12 Winner of the 2019 Phi Beta Kappa Award for Science A valuable perspective on the most important problem of our time Adam Becker NPR Light of the Stars tells the story of humanity s coming of age as we realize we might not be alone in this universe Astrophysicist Adam Frank traces the question of alien life from the ancient Greeks to modern thinkers and he demonstrates that recognizing the possibility of its existence might be the key to save us from climate change With clarity and conviction Light of the Stars asks the consequential question What can the likely presence of life on other planets tell us about our own fate      **Dispositional**

**Pluralism** Jennifer McKittrick,2018 Jennifer McKittrick offers an opinionated guide to the philosophy of dispositions In her view when an object has a disposition it is such that if a certain type of circumstance were to occur a certain kind of event would occur Since it is very common for this to be the case for a variety of reasons dispositions are very abundant and diverse They include such varied properties as character traits like a hero s courage characteristics of physical objects like a wine glass s fragility and characteristics of microphysical entities like an electron s charge Some dispositions are natural while others are non natural Some dispositions called powers are ungrounded while non fundamental dispositions are grounded in other properties Some dispositions manifest constantly some of them manifest spontaneously while others manifest only when they are triggered to do so Some dispositions manifest by causing another dispositional property to be instantiated while others have manifestations that involve non dispositional properties and relations Some dispositions are intrinsic to their bearers while others are extrinsic Some of them are causally relevant to their manifestations while others are not Some dispositions manifest in some particular way in particular circumstances while other dispositions manifest in various ways in various circumstances What makes all of these diverse properties dispositions is their connection to a certain kind of counterfactual fact Nevertheless disposition ascriptions are not semantically reducible to counterfactual claims
