Building Technology:

Basics Building Technology Bert Bielefeld, 2017 As building construction is becoming increasingly complex the field of building technology is becoming more and more important As an intermediary between all parties involved in a construction project the architect must be able to understand what is involved and to advise his clients This volume covers the fields of water supply and disposal electric installations and the energy related subjects i e heating ventilation and lighting The compendium combines the successful individual volumes Room Conditioning and Water Cycles and supplements these with the two hitherto unpublished volumes Electric Installation and Lighting design The student and architect are introduced to the basic principles terms and systems of building technology installations and equipment

Building Technology Ian Chandler, 1989 Developed for trainee and practising building professionals this volume develops the crucial concept of a satisfactory building in terms of its performance both as a whole and as a series of interrelated elements
