earliest cultivation in Mesoamerica to the present day Tracing the cocoa value chain from farms in Africa Asia Latin America and the Caribbean through to chocolate factories in Europe and North America Leissle shows how cocoa has been used as a political tool to wield power over others Cocoa s politicization is not however limitless it happens within botanical parameters set by the crop itself and the material reality of its transport storage and manufacture into chocolate As calls for justice in the industry have grown louder Leissle reveals the possibilities for and constraints upon realizing a truly sustainable and fulfilling livelihood for cocoa growers and for keeping the world full of chocolate
