Collaborative Learning in a Global World Miri Shonfeld, David Gibson, 2018-11-06 This book explores the impact of global changes on education emphasizing the need for collaborative learning skills It highlights the importance of training teachers in teamwork to serve as role models and addresses the rapid pace of new practices The book provides theoretical guidance and practical examples to bridge research gaps *Digital Collaborative Learning in General, Higher, and Business Education* Henrik Bellhäuser, Sanna Järvelä, Rene Roepke, Christin Siegfried, Carolyn Rose, 2025-04-10 Please note that all spontaneous submissions are required to submit an abstract and await feedback before submitting the full manuscript any spontaneous submissions which only submit a full manuscript will be rejected Collaborative learning takes place with the expectation that people will achieve more together than alone Crucial to this is the appropriate composition of groups and the participation of each group member through communication written verbal or non verbal by sharing ideas experiences and knowledge in a diverse and elaborate way However collaboration is extended and substantially changed by the Internet and other technologies The always on connection to the Internet enables people to be in contact with peers anytime and anywhere and can help to overcome social isolation which is particularly common in digital learning contexts not least because it can positively influence learner satisfaction The ability to record speech and writing in a digital context encourages reflection on one's own contributions before they are made available to the group Moreover digital applications and methods can support the externalization of one's own thinking and learning processes to the group members AI helps to investigate how collaborative learning works e.g. through data driven methods of learning analytics
