800 Million Pill:

The \$800 Million Pill Merrill Goozner, 2005-10-10 Goozner shows how drug innovation is driven by dedicated scientists intent on finding cures for diseases not by pharmaceutical firms whose bottom line often takes precedence over the advance of medicine Stories of a university biochemist who spent twenty years searching for single blood protein that later became the best selling biotech drug in the world a government employee who discovered the causes for dozens of crippling genetic disorders and the Department of Energy funded research that made the Human Genome Project possible these accounts illustrate how medical breakthroughs actually take place *The \$800 Million Pill* Merrill Goozner, 2005-10-10 Goozner shows how drug innovation is driven by dedicated scientists intent on finding cures for diseases not by pharmaceutical firms whose bottom line often takes precedence over the advance of medicine Stories of a university biochemist who spent twenty years searching for single blood protein that later became the best selling biotech drug in the world a government employee who discovered the causes for dozens of crippling genetic disorders and the Department of Energy funded research that made the Human Genome Project possible these accounts illustrate how medical breakthroughs actually take place *It's Enough to Make You Sick* Jeffrey M. Lobosky, 2012-04-16 More and more Americans are finding themselves without health insurance or with coverage that is so inadequate they face financial ruin in the event they actually get sick So they go without Their children don't receive their immunizations They allow that worrisome lump in their breast to grow so large that by the time the cancer has been detected it has spread beyond the ability to cure Seniors can't pay their heating bills or sustain adequate nutrition as the rising cost of their prescription drugs compels them to make difficult choices Just how did our system become so dysfunctional and who is responsible This book will tell you Too often discussions on the health care crisis focus a myopic lens on the usual suspects We are all quick to point a finger at insurance companies who place profit over patients or the pharmaceutical industry that extorts obscene amounts of American dollars for the same drugs that cost 50 to 75 percent less when we cross our borders north or south We blame trial lawyers who practice with a lottery mentality that protects neither the patient from negligent care nor good physicians from frivolous lawsuits But the culpability for our crisis is more widespread Hospitals have devolved from not for profit community based institutions to large national for profit chains Doctors no longer spend time with their patients but instead rely on expensive and often times unnecessary tests and use physician extenders such as P A s and nurse practitioners to move patients along like cars on an assembly line Politicians pass well meaning laws as a knee jerk reaction to a specific issue without understanding the unexpected consequences which frequently only exacerbate the problem And they operate in a system of special interests and influence peddling that all but assures the failure of any meaningful health care reform And while we all demand high quality health care few actually take preventative measures that could keep them out of the system they deride This is a public that eats drinks and smokes to excess yet exercises far too seldom *It's Enough to Make You Sick The Failure of American Health Care and a Prescription for*

the Cure discusses how things got so bad tracking the origins of the U S health care system and illuminating how each of the important components have evolved over the last century Lobosky explains how the varied special interests have conspired to create a system that is by far the costliest in the world and yet is mediocre at best in providing quality care He explores the various culprits and how each has contributed to the sad state of affairs The Patient Protection and Affordable Care Act is dissected in detail and a practical and compassionate blueprint for meaningful reform is offered to remedy the situation This book is a must read for every American who is frustrated and disheartened by the recent health care battles for every American who suffers through the best health care system in the world and for every American who wants to assure quality care for themselves and those they love

Deadly Monopolies Harriet A. Washington,2012-11-13 From the award winning author of Medical Apartheid an expos of the rush to own and exploit the raw materials of life including yours Think your body is your own to control and dispose of as you wish Think again The United States Patent Office has granted at least 40 000 patents on genes controlling the most basic processes of human life and more are pending If you undergo surgery in many hospitals you must sign away ownership rights to your excised tissues even if they turn out to have medical and fiscal value Life itself is rapidly becoming a wholly owned subsidiary of the medical industrial complex Deadly Monopolies is a powerful disturbing and deeply researched book that illuminates this life patent gold rush and its harmful and even lethal consequences for public health Like the bestselling The Immortal Life of Henrietta Lacks it reveals in shocking detail just how far the profit motive has encroached in colonizing human life and compromising medical ethics

Ethics and the Business of Biomedicine Denis G. Arnold,2009-06-11 Distinguished scholars of bioethics and business ethics discuss justice in relation to business friendly strategies in the delivery of health care

The Oxford Handbook of Business Ethics George G. Brenkert,Tom L. Beauchamp,2012-04-19 The Oxford Handbook of Business Ethics is a comprehensive treatment of the field of business ethics as seen from a philosophical approach The volume consists of 24 essays that survey the field of business ethics in a broad and accessible manner covering all major topics about the relationship between ethical theory and business ethics

Big Pharma Jacky Law,2006 Pharmaceutical medicine is very very big business The top ten players earned more than 200 billion in 2003 One drug Pfizer s cholesterol pill Lipitor had sales of more than 9 billion This kind of money buys an awful lot of friends among doctors and politicians Most of those involved in the formulation of public health policy seems happy with the present system The trouble is that the public is starting to have doubts There is a growing sense that the vast profits of drug companies and their control of the research agenda might not be that good for our health Jacky Law takes the reader on a journey through the pharmaceutical business and shows how the public is quite right to be concerned about conventional medicine as it has developed since the late 1970s She tells a story of spectacular regulatory failure phenomenally high prices betrayal of the public interest and a growing awareness among ordinary people that things could be very different Sophisticated marketing and public relations not scientific excellence have helped corporations to
