## STRUCTURAL FUNCTIONAL APPROACH

- The structural functional approach had its origin in anthropology and sociology
- In 1970s, in political science this concept was given by Gabriel Almond and Powell to comparing political systems - it is necessary to understand not only political institutions {structures} but also their functions
- **What is meaning of structure** - it refers to the observable activities which make up the observable system and it consists of some patterns and specific structure – political economy, society, cultural structure etc.
- **Function** - the actions that are performed to maintain the system  
Eg- legislature – making rule  
Executive – implementing laws

Structure functionalism is a tool of investigation which performs the task of explaining what political structures perform what basic functions in the political system

- Structural functional analysis revolves around the two key concepts 1} **structure** 2} **function**
