Advances in Parallel Computing, 1990 Software for Parallel Computation Janusz S. Kowalik, Lucio Grandinetti, 1993-04-13 Proceedings of the NATO Advanced Workshop on Software for Parallel Computation held at Cetraro Cosenza Italy June 22 26 1992 **Advances in Parallel Computing** David J. Evans, 1990 Advances in Parallel Computing Algorithms, Tools and Paradigms D. J. Hemanth, T. N. Nguyen, J. Indumathi, 2022-11-23 Recent developments in parallel computing for various fields of application are providing improved solutions for handling data These newer innovative ideas offer the technical support necessary to enhance intellectual decisions while also dealing more efficiently with the huge volumes of data currently involved This book presents the proceedings of ICAPTA 2022 the International Conference on Advances in Parallel Computing Technologies and Applications hosted as a virtual conference from Bangalore India on 27 and 28 January 2022 The aim of the conference was to provide a forum for the sharing of knowledge about various aspects of parallel computing in communications systems and networking including cloud and virtualization solutions management technologies and vertical application areas The conference also provided a premier platform for scientists researchers practitioners and academicians to present and discuss their most recent innovations trends and concerns as well as the practical challenges encountered in this field More than 300 submissions were received for the conference from which the 91 full length papers presented here were accepted after review by a panel of subject experts Topics covered include parallel computing in communication machine learning intelligence for parallel computing and parallel computing for software services in theoretical and practical aspects Providing an overview of recent developments in the field the book will be of interest to all those whose work involves the use of parallel computing technologies Subject Guide to Books in Print, 1991 *New Serial Titles*, 1992 *Parallel Computing in Science and Engineering* Rüdiger Dierstein, Dieter Müller-Wichards, Hans-Martin Wacker, 1988-05-11 It was the aim of the conference to present issues in parallel computing to a community of potential engineering scientific users An overview of the state of the art in several important research areas is given by leading scientists in their field The classification question is taken up at various points ranging from parametric characterizations communication structure and memory distribution to control and execution schemes Central issues in multiprocessing hardware and operation such as scalability techniques of overcoming memory latency and synchronization overhead as well as fault tolerance of communication networks are discussed The problem of designing and debugging parallel programs in a user friendly environment is addressed and a number of program transformations for enhancing vectorization and parallelization in a variety of program situations are described Two different algorithmic techniques for the solution of certain classes of partial differential equations are discussed The properties of domain decomposition algorithms and their mapping onto a CRAY XMP type architecture are investigated and an overview is given of the merit of various approaches to exploiting the acceleration potential of multigrid methods Finally an abstract performance modeling technique

for the behavior of applications on parallel and vector architectures is described **Advances in Computer Methods for Partial Differential Equations**, 1987 Practical Applications of Parallel Computing Laurence Tianruo Yang, 2003 The continuous progress in scientific research is one of the important factors explaining the constantly increasing demand for computational power On the other hand one of the results of such progress is the availability of more powerful computer platforms To that end this volume reviews a broad array of subjects based on the solutions to the daily problems in industrial production research and development **Advances in Computer Methods for Partial Differential Equations-VI** Robert Vichnevetsky, Robert S. Stepleman, 1987 **Computer Science Logic** Mogens Nielsen, 1998-05-20 This book constitutes the strictly refereed post workshop proceedings of the 11th International Workshop on Computer Science Logic CSL 97 held as the 1997 Annual Conference of the European Association on Computer Science Logic EACSL in Aarhus Denmark in August 1997 The volume presents 26 revised full papers selected after two rounds of refereeing from initially 92 submissions also included are four invited papers The book addresses all current aspects of computer science logics and its applications and thus presents the state of the art in the area **Advances and Developments, 1994-2005** Elias A.
