Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection *The Rough Guide to Wales* Paul Whitfield, Catherine Le Nevez, Mike

Parker, 2012-01-01 Suggests lodging food and sightseeing highlights along with travel tips and cultural information

**Places of Special Virtue** Alasdair Whittle, 2017-02-20 This volume explores the landscape settings of megalithic chambered monuments in Wales Set against a broader theoretical discussion on the significance of the landscape the authors consider the role of visual landscapes in prehistory meanings attached to the landscape and the values and beliefs invested in

it Wales is rich in Neolithic monuments but the general absence of certain classic monumental forms found in the rest of Britain and Ireland such as causewayed enclosures henges and cursus monuments seems to have marginalized the Welsh record from many wider discussions on the Neolithic. Instead of seeing Wales as an area which lacks many of these classic components Cummings and Whittle argue that Wales has its own unique and individual Neolithic which is simply different from the Neolithic found further to the east. It is suggested that this difference may relate to an essentially mobile existence with strong links back to the Mesolithic period. The authors present three detailed case studies examining the settings of sites in southwest, northwest and southeast Wales. They outline the history of research for each region including the previous classification of the monuments and any excavations and describe the specific landscape settings of the monuments. They assess the significance of a variety of landscape features which would have been visible from the monuments in particular emphasizing the mythological and symbolic significance of the sea, rivers and mountains. An illustrated inventory of sites completes the volume.
