connected to any particular religion and its leading ideas and arguments are of general philosophical significance. The author illustrates the importance of Islamic thought within philosophy through the use of many modern examples. He describes and contrasts the three main movements in Islamic philosophy: Peripatetic, Sufi, and Illuminationist, and examines the Persian as well as the Arabic traditions. Wide coverage is given to key aspects of Islamic philosophy including epistemology, ontology, politics, ethics, and philosophy of language, providing readers with a balanced view of the discipline. The second edition has been thoroughly revised and updated throughout, including the addition of two new chapters on recent debates surrounding Islam's need for an enlightenment and on the future of Islamic philosophy. The new edition of *Islamic Philosophy* will continue to be essential reading for students and scholars of the subject as well as anyone wanting to learn more about one of the most significant and influential philosophical traditions in the world today. [Abraham's Dice](#) Karl W. Giberson, 2016-04-18

Most of us believe everything happens for a reason. Whether it is God's will, karma, or fate, we want to believe that nothing in the world, especially disasters and tragedies, is a random, meaningless event. But now, as never before, confident scientific assertions that the world embodies a profound contingency are challenging theological claims that God acts providentially in the world. The random and meandering path of evolution is widely used as an argument that God did not create life. Abraham's Dice explores the interplay between chance and providence in the monotheistic religious traditions, looking at how their interaction has been conceptualized as our understanding of the workings of nature has changed. This lively historical conversation has generated intense, ongoing theological debates and provocative responses from science: what are we to make of the history of our universe where chance and law have played out in complex ways? Or the evolution of life where random mutations have challenged attempts to find purpose within evolution and convinced many that human beings are but a glorious accident? The enduring belief that everything happens for a reason is examined through a conversation with major scholars among them holders of prestigious chairs at Oxford and Cambridge Universities and the University of Basel, as well as several Gifford lecturers and two Templeton prize winners. Organized historically, Abraham's Dice provides a wide-ranging scientific, theological, and biblical foundation to address the question of providence and divine action in a world shot through with contingency. **The Shari'a and Islamic Criminal Justice in Time of War and Peace** M. Cherif Bassiouni, 2014

Shows that the shari'a and Islamic law are compatible with contemporary international human rights laws and norms and appropriate for use in Muslim societies. **History of Islamic Philosophy** Seyyed Hossein Nasr, 1996

*Islamic Philosophy* has often been treated as mainly of historical interest, belonging to the history of ideas rather than to philosophy. This is volume challenges this belief. The Routledge *History of Philosophy* is made up entirely of essays by a distinguished list of writers. They provide detailed discussions of the most important thinkers and the key concepts in Islamic philosophy from earliest times to the present day. **The Biographical Encyclopedia of Islamic Philosophy: J-Z** Oliver Leaman, 2006
