Breakthrough Thinking

We've been talking about the computer age and whether or not it's real. I hope you realize by now that it either is, or isn't, depending on you. It really depends upon your attitude, your perception, what you see in the world, and the advantage you take of the opportunities that to come you. I think we're living in an age of breakthrough. I think there are breakthroughs all around us. You know about the technological ones, you know about the scientific ones. The question is, are we making the same kind of breakthroughs in our personal life? Are you making breakthroughs at business, in education, in government, in your family, in your home? How do we prepare to do that?

You see, I think that you can learn a skill that I call, 'Breakthrough thinking.' When you face a new technology, when do you buy a new computer? You have a computer? A new one comes out, when do you buy the new one? Well, not today. A week later, two weeks or when? How do you decide? What's the criterion? How do you know when it's time for you? You have to have some kind of criterion about productivity, how you feel about what you're doing and when it's time to change. I think you need to learn this skill that I call, 'Breakthrough thinking.'

We've emphasized over and over again how you have to be willing to be ignorant. You have to hang out in the not knowing. The people who I admire and trust the most, the ones I respect the most, are people who are willing to say in public, "I don't know." That means they are telling the truth. So, if somebody says to them, "Which of these computers do you think we should get?" and the guy says, "I don't know." Then we ask, "How do you think we should find out?" He responds, "Gee, I don't know." I trust that person. I will say to them, "Good, let's figure it out," and they say, "Fine, be glad to figure it out, I just don't know!"
