Be A Computer Literate:

Be a Computer Literate Marion J. Ball, Sylvia Charp, 1977 **Computer Literacy** John V. Lombardi, 1983 **Are You Computer Literate?** Karen Billings, David G. Moursund, 1979 Discusses What Computers Are How They Are Used How They Affect People Written by Educators in a Format Suited for Self Instruction *Emergent Computer Literacy* Helen Mele Robinson, 2008-11-19 The United States is currently grappling with how to prepare our students to be computer literate citizens in the competitive technological world we live in Understanding how children develop computer knowledge and the ways that adults are able to guide their computer learning experiences is a vital task facing parents and educators This groundbreaking book is an attempt to fill a gap in current understanding of how we become computer literate and proposes a theory of how computer literacy skills emerge in computer users Computers for People Jack B. Rochester, Jon Rochester, 1994 To be literate means to be knowledgeable or educated about something Computer literacy is being knowledgeable about the computer and how it works in our daily lives It also means being able to operate and use a computer at least to perform basic tasks **Computer Literacy** Robert J. Seidel, Ronald E. Anderson, Beverly Hunter, 2014-05-10 *Computer Literacy Issues and Directions for 1985* is based on a conference entitled National Goals for Computer Literacy in 1985 held in Reston Virginia on December 18 20 1980 under the auspices of the National Science Foundation The conference provided a forum for discussing views on computer literacy as well as methods for infusion of computer related objectives and activities into existing curricula for different age levels Issues and barriers to developing national goals for achieving a computer literate society in the United States are also examined Comprised of 31 chapters this book begins by presenting four major approaches to a perspective on computer literacy impact of computer literacy on the citizenry major national components of a computer literacy program development of an information handling curriculum for an evolving computer literacy concept and a 30 year historical overview of computer events in three strands research development technology education and social political institutional The next section considers the definitions and requirements of computer literacy as they impact society students and teachers The use of the computer in cognitive research and in problem solving is also discussed together with curriculum development in computer literacy This monograph will be of interest to students teachers school administrators and educational policymakers Multiliteracies for a Digital Age Stuart Selber, 2004-01-23 Just as the majority of books about computer literacy deal more with technological issues than with literacy issues most computer literacy programs overemphasize technical skills and fail to adequately prepare students for the writing and communications tasks in a technology driven era *Multiliteracies for a Digital Age* serves as a guide for composition teachers to develop effective full scale computer literacy programs that are also professionally responsible by emphasizing different kinds of literacies and proposing methods for helping students move among them in strategic ways Defining computer literacy as a domain of writing and communication Stuart A Selber addresses the questions

that few other computer literacy texts consider What should a computer literate student be able to do What is required of literacy teachers to educate such a student How can functional computer literacy fit within the values of teaching writing and communication as a profession Reimagining functional literacy in ways that speak to teachers of writing and communication he builds a framework for computer literacy instruction that blends functional critical and rhetorical concerns in the interest of social action and change Multiliteracies for a Digital Age reviews the extensive literature on computer literacy and critiques it from a humanistic perspective This approach which will remain useful as new versions of computer hardware and software inevitably replace old versions helps to usher students into an understanding of the biases belief systems and politics inherent in technological contexts Selber redefines rhetoric at the nexus of technology and literacy and argues that students should be prepared as authors of twenty first century texts that defy the established purview of English departments The result is a rich portrait of the ideal multiliterate student in a digital age and a social approach to computer literacy envisioned with the requirements for systemic change in mind
