

How can we support reframing our kids' behavior as communication?

Presume competence

Talk to your child directly, not around them or about them, and encourage other people to do the same.

Identify strengths

Talk to your child about what they are doing well, and build their strengths and preferences into their daily routines.

Give choice and control

Help your child develop skills to navigate the world with as much independence as possible.

Look for environmental or sensory barriers

Understand that your child's behavior may express their discomfort or desire to escape a situation.

We are what we eat That old expression seems particularly poignant every time we have our blood drawn for a routine physical to check our cholesterol levels And it s not just what we eat that affects our health Whole ranges of behaviors ultimately make a difference in how we feel and how we maintain our health Lifestyle choices have enormous impact on our health and well being But how do we communicate the language of good health so that it is uniformly received and accepted by people from different cultures and backgrounds Take for example the case of a 66 year old Latina She has been told by her doctor that she should have a mammogram But her sense of fatalism tells her that it is better not to know if anything is wrong To know that something is wrong will cause her distress and this may well lead to even more health problems Before she leaves her doctor s office she has decided not to have a mammogram that is until her doctor points out that having a mammogram is a way to take care of herself so that she can continue to take care of her family In this way the decision to have a mammogram feels like a positive step Public health communicators and health professionals face dilemmas like this every day *Speaking of Health* looks at the challenges of delivering important messages to different audiences Using case studies in the areas of diabetes mammography and mass communication campaigns it examines the ways in which messages must be adapted to the unique informational needs of their audiences if they are to have any real impact *Speaking of Health* looks at basic theories of communication and behavior change and focuses on where they apply and where they don t By suggesting creative strategies and guidelines for speaking to diverse audiences now and in the future the Institute of Medicine seeks to take health communication into the 21st century In an age where we are inundated by multiple messages every day this book will be a critical tool for all who are interested in communicating with diverse communities about health issues
