READING STAGES

Harvard professor Jeanne Chall is known for his work on the developmental stages of reading. She was one of the first researchers to describe reading as a developmental process. His book, *Learning to Read: The Great Debate*, published in 1967, summarizes his findings on the controversy (which continues to this day) between advocates of phonetics and advocates of the semantic-based reading approach. I am. Ball's study shows that learning the alphabet's codes (also known as phonological recognition, word analysis, decoding, and connections between sounds and symbols) is important to begin learning to read, but less I conclude that it is not important. Another important factor is learning the language, good teaching materials, and a reasonable level of difficulty.

	Stage	Age	Key characteristics
0	Pre-reading and pseudo-reading	Up to 6	Pretend reading, turning pages. Some letter recognition, especially letters in own name. Often predicting stories and words.
1	Initial reading and decoding	6-7	Reading simple texts containing high frequency lexis. Chall estimated about 600 words understood.
2	Confirmation and fluency	7-8	reading more quickly, accurately, paying more attention to meaning of words. How many written words understood? 3,000.
3	Reading for learning	9-14	Reading for knowledge as motivation
4	Multiplicity and complexity	14-17	Responding critically to what they read and analysing texts.
5	Construction and reconstruction	18+	Reading selectively and forming opinions.
