

The procedure in Illustration No. 4 is a diagram of the action. The basic design elements involved here is the fundamental concept of opposites, the most basic of design principles. The use of opposites is a fact that not only creates visual interest, but each helps to clarify the other. The follow-up called this page "Visual Poets."

Illustration No. 4

Illustration No. 1

The follow-up that you look for is that we look for and use as much as help or understand and describe the action. As the time, generally you will see the end of lines, as defined by the central axis of the form. The most useful looking elements are the ends of the lines at the various joints.

If you look back at the other. The composition of the parts of the figure creates a very general sense of showing the direction of the form. Illustration No. 1 shows you how the line is formed. The end of the line along with the opposite of the form creates some clear points for you to use in your drawing. When the arm is straight, the points are a straight line. When you bend your arm, the tip of the line drops. The straight line becomes the end of the cylinder of the forearm. The arm created by the line becomes the most to define the structure of the forearm in space.
