## **Assessing Object Relations Phenomena:**

Assessing Object Relations Phenomena Morton Kissen, 1986      The Assessment of Object Relations Phenomena in Adolescents: Tat and Rorschach Measu Francis D. Kelly, 2014-01-14

This book offers clinicians a long awaited comprehensive paradigm for assessing object relations functioning in disturbed younger and older adolescents It gives a clear sense of how object relations functioning is manifest in different disorders and illuminates how scores on object relations measures are converted into a therapeutically relevant diagnostic matrix and formulation Outlining the process of object relations assessment Kelly presents vividly detailed cases of a range of disorders including anorexia nervosa borderline states depressive disorders and trauma The cases portray the vicissitudes of object relations functioning and disruption that result in a unique structural developmental composite for a given adolescent A major concern is demonstrating the utility and validity of two object representation measures The Mutuality of Autonomy Scale MOA and The Social Cognition Object Relations Scale SCORS that are the main ones employed in the assessment of adolescents MOA and SCORS scores facilitate a multidimensional understanding of the nuances of an adolescent s object relations functioning and provide clinicians with organized theory based data leading to clear specific treatment directions and guidelines and appropriate therapeutic programming The book addresses the following questions Is individual psychotherapy indicated will this adolescent benefit from an insight oriented approach What are the likely directions that transference parameters will take in the treatment What types of countertransference reactions are likely to be anticipated in a given patient Is medication likely to be helpful in making this adolescent more accessible for treatment Focusing only on adolescents covering both the TAT and the Rorschach and utilizing object relations theory as its major interpretive foundation the book offers practitioners an alternative to general references based on a more actuarial nomothetic and atheoretical interpretive approach It reflects one school of contemporary thought in projective assessment one that advocates a more phenomenological theory based approach to test application and interpretation

*The Assessment of Object Relations Phenomena in Adolescents* Francis D. Kelly, 1997 This book offers clinicians a long awaited comprehensive paradigm for assessing object relations functioning in disturbed younger and older adolescents It gives a clear sense of how object relations functioning is manifest in different disorders and illuminates how scores on object relations measures are converted into a therapeutically relevant diagnostic matrix and formulation Outlining the process of object relations assessment Kelly presents vividly detailed cases of a range of disorders including anorexia nervosa borderline states depressive disorders and trauma The cases portray the vicissitudes of object relations functioning and disruption that result in a unique structural developmental composite for a given adolescent A major concern is demonstrating the utility and validity of two object representation measures The Mutuality of Autonomy Scale MOA and The Social Cognition Object Relations Scale SCORS that are the main ones employed in the assessment of adolescents MOA and SCORS scores facilitate a multidimensional understanding of the nuances of an adolescent s object

relations functioning and provide clinicians with organized theory based data leading to clear specific treatment directions and guidelines and appropriate therapeutic programming The book addresses the following questions Is individual psychotherapy indicated will this adolescent benefit from an insight oriented approach What are the likely directions that transference parameters will take in the treatment What types of countertransference reactions are likely to be anticipated in a given patient Is medication likely to be helpful in making this adolescent more accessible for treatment Focusing only on adolescents covering both the TAT and the Rorschach and utilizing object relations theory as its major interpretive foundation the book offers practitioners an alternative to general references based on a more actuarial nomothetic and atheoretical interpretive approach It reflects one school of contemporary thought in projective assessment one that advocates a more phenomenological theory based approach to test application and interpretation

**Self Psychology and Diagnostic Assessment** Marshall L. Silverstein, 1999-01-01 The self psychology of Heinz Kohut has been an important force in contemporary psychoanalytic thought and its ramifications for therapy have been extensively explored Now Marshall Silverstein offers the first analysis of the application of self psychology to projective diagnostic assessment Differentiating the self psychological approach from an ego psychological interpretation of classical drive theory he clearly outlines the principal contributions of Kohut including the concepts of selfobject functions empathy transmuting internalization and compensatory structure Providing numerous clinical examples he shows how the major selfobject functions of mirroring idealization and twinship can be identified on projective tests Silverstein then demonstrates how conventional assessment approaches to grandiosity self esteem and idealization can be reconceptualized within the framework of self psychology and he also contrasts ego psychological interpretations with self psychological interpretations This book makes a strong case for the importance of the clinical identification of self states It will help practitioners understand their patients varied attempts to repair an injury to the self to restore self esteem compensatory structure and the clinical consequences of self disorders including disintegration products such as narcissistic rage and affect states characterized by empty depression chronic
