Gas Phase Chromatography Rudolf Kaiser, 2012-12-06 THE remarkable capabilities of capillary gas partition chromatography or in short capillary chromatography are beyond all doubt In spite of this difficulties are continually arising in the experimental realization of this interesting development of gas chromatography and this hinders the rapid acceptance of these methods For this reason in the present work I have dealt with experimental and practical problems rather than with theoretical aspects hoping that this may serve to remove many of the problems concerned The present publication is based on experimental work carried out in

productive collaboration with my teachers and colleagues to whom I owe a great deal I should like to thank the following for their valuable assistance and stimulating suggestions Professor E Cremer Dr H Kienitz and his colleagues Professor A I M Keulemans Dr I Halasz and in particular Mr D H Desty and Dr R P W Scott I should also like to thank the management of the Badische Anilin und Sodafabrik AG Ludwigshafen for their generous support and for per mission to publish this book The outstanding co operation of the Verlag Bibliographisches Institut Mannheim was for me a particular pleasure
