Ensuring access to education for the Dalits of India has been the greatest challenge for the Indian government in diminishing the social effects of the caste system, which still remain entrenched in Indian society. There have been many different reasons proposed as to why the Dalits suffer from low rates of literacy and primary education enrolment, but the most realistic one describes history and unequal access as the causes. The ancient caste system of India, which has resulted in the social and economic oppression of the Dalits, continues to play a dominant role in India. The Dalits, also known as the scheduled caste or untouchables, have experienced consistent denial to access to education since the 1850s. This decade coincided with Britain's established control over India, which meant many of the improvements to Dalit education were coming from outside influences, rather than from the national government. Because of unchanging social norms and behaviour, incentives to pursue education were minimal for the Dalits who were still physically and emotionally harassed. Increasing efforts to eliminate caste discrimination combined with additional attempts to increase the accessibility and appeal for education have contributed to the slow progression of Dalit education. The responsibility for social equalization fell fully upon the Indian government when it gained its independence from Britain in 1948. While some benefits of social programs and government policies designed to increase primary education rates can be noticed, the Dalit literate population still remains much lower than that of the rest of India. There remains still, hostility, oppression and flaws in social programs in Indian society that prevent an increase in education growth. Despite efforts to decrease caste discrimination and increase national social programs, the Dalits of India continue to experience low enrolment rates and a lack of access to primary education in comparison to the rest of India.

Historical Context

Deeply entrenched in Indian society is the complex social stratification of individuals known as the caste system. It is a division of society traditionally based on occupation and family lineage. In India, the caste system is divided into five separate classes. The highest class in Indian society is that of the priests and teachers, or Brahmins, followed by the warrior class, the Kshatriyas. Third ranked are those who fall in the farmer and merchant class, the Vaishyas, followed by the fourth ranked labourer class, the Shudras ("The Caste System in Hinduism"). The fifth group, which was seen as being so low as to not deserve being placed in a caste, were the Dalits. Often referred to in Indian culture as the untouchables, these were the people who have the harshest and most unjust restrictions imposed upon them (Desai & Kulkarni).

The organization of the caste system and its entrenchment within Indian history has resulted in centuries of hostile interaction between classes. In rural areas, Dalits were excluded from temples, village wells and tea shops. In some areas of the country, the Dalits were not permitted to walk in daylight for their shadows were considered pollution (Nambissan 1011). In addition to the cruel and humiliating circumstances the Dalits have been put in, their efforts to improve their situation have often been squashed by assault, rape and murder by upper castes threatened by the Dalits' search for equality (Bob 173). The cruel and unjust treatment imposed upon the Dalits has decreased in frequency as history has progressed, although it still continues in today's society.

After the introduction of the Scheduled Caste and Scheduled tribe Prevention of Atrocities Act of 1989, the practice
