burdened by too much theory it is extremely easy to read with short distinguishable chapters With only 269 pages and a

thorough index it is also easy to carry and consult Business Information Alert This book written by planners for planners will

assist the reader in applying microcomputer resources efficiently and imaginatively in solving common planning problems

This is not a book about microcomputers nor is it a book about planning It is rather the first book to clearly explain and

vividly illustrate how a microcomputer is used to solve major classes of planning problems The authors examples detail ways

to productively employ several planning tools including spreadsheets databases and modeling environments Further

individual chapters shed light on the microcomputer technology that is relevant to planning but often poorly understood

Current and developing technologies are covered and a framework for comprehending and evaluating future technological

developments is presented Behavioral implications of the microcomputer revolution are not ignored The authors examine the

evolving role of the planner and planning department in the organization For those planners feeling confined or confused by

computing environments this book may well point the way to greater independence and understanding It provides a bridge

between the computing world and the planner Various sections explain how to build run and maintain microcomputer based

planning systems The authors through their examples explain the major types of software useful to planners and indicate

which type is suitable for each class of planning problem The examples illustrate good practices to pursue and common

pitfalls to avoid in micro based planning This book addresses themes and issues common to a broad range of planning

operations and applications It should therefore be accessible to the reader with little formal microcomputer training as well

as the veteran who seeks an integrated vision of micro based planning This reference belongs in the office of every planner
