Reasonable Children Michael S. Pritchard,1996 The public outcry for a return to moral education in our schools has raised more dust than it s dispelled Building upon his provocative ideas in *On Becoming Responsible* Michael Pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness Pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills Reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community In such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves

Advocating approaches to moral education that avoid mindless indoctrination and timid relativism Pritchard neither preaches nor hides behind abstractions He makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility He also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state Pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers The result is a rich and insightful work that provides real hope for the future of our children and their moral education

Teaching for Thinking James W. Keefe,Herbert J. Walberg,1992 This volume represents a variety of current efforts to incorporate thought provoking methods into teaching There are three sections Curriculum Developments defines key curricular terms and offers a framework and general examples of teaching tactics In this section Barbara Presseisen distinguishes thinking from other cognitive activities and shows how conation motivation and striving and knowledge representation are being used to promote thinking Robert Marzano discusses three domains learning to learn content thinking and reasoning assignable to specific subjects and Francis Schrag describes how to promote deep thinking in the classroom Teaching and Assessment describes new methods for teaching thinking and assessing student progress Barak Rosenshine and Joseph Guenther describe scaffolding temporary instructional supports and Ann Brown and Joseph Campione urge incorporation of thinking into all school programs through reciprocal teaching strategies Charles Letteri s essay focuses on assessing students learning strengths and weaknesses as a diagnostic tool for guiding individualized and group programs to improve classroom performance Robert Ennis discusses several tests and techniques for measuring thinking for accountability Concluding Perspectives synthesizes research on practical methods of teaching thinking in essays contributed by Barry Beyer Robert Sternberg and James Keefe Most chapters contain reading suggestions MLH *From Critical*
