Progress It were tedious to the reader were I to recount here the various mischances want of stereotyping etc which have kept this work out of print for more than three years in the face of a steadily increasing public demand but in issuing a new edition it is necessary perhaps that I should offer some remarks on the alterations and additions which I have deemed it expedient to make in the original text The alterations are few being limited chiefly to the titles of one or two of the chapters my object being to enable the reader to see more clearly and at a glance the essential connexions of the successive chapters in a work the subject matter of which is so wide and complex that the approaches to it must of necessity be more or less circuitous and involved And accordingly for How is Justice done the original title first chapter of the Second part I have substituted How is Civilization possible and for The End of Government About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

This book is an expanded version of *The Rhythms of History* the book that made macro History into a semi quantitative Science New features include 1 an appendix showing how the history of Mayan civilization conforms to the book s Theory of Civilizations including the latest information from the newly discovered hieroglyphic texts at Dos Pilas Guatemala 2 an appendix on the sub Saharan African civilization Great Zimbabwe showing it fits the theory 3 a comparison of the theory with Toynbee s observations showing the many new features resulting from a quantitative theory 4 numerous historic pictures and illustrations of the civilizations of Mankind including a number of newly found pictures from the nineteenth century 5 a chapter describing the potentially disturbing implications of patterns in civilizations Are we free and the implications for the Philosophy of History and 6 expanded comments in many sections such as the sections on the future of Humanity the role of China and the Islamic West conflict The book begins with a hard hitting tell it like it is chapter on the current international situation with statements such as The United States and Western civilization is now engaged in a small Vietnam style war on a global scale at the time of this writing This war is still in the early stages of development The attack on the World Trade Center by Muslim terrorists may have the same significance for Western civilization that the Gothic invasion of Rome itself in the prime of the Empire the First Century AD had for the future of Rome They may be a premonition of things to come not necessarily soon but perhaps in a few centuries The Goths returned three centuries later and remained as permanent conquerors Over the long term the West must free itself from a dependence on Muslim oil Muslim oil revenues are the fuel for the development of weapons of mass destruction by Iran and Iraq In the future they will supply the revenues of an expansionist Islam As the silk trade looted the Roman Empire of its gold and reduced its economy the trade in oil is looting the West of its prosperity and freedom of action The rise and fall of oil prices has a significantly greater effect on the American and world economy than the raising and lowering of interest rates by central banks The book then describes a theory of civilizations that led to these observations Currently unfolding events seem to be fulfilling the predictions which were made last year including the new North Korean threat that seems to be consistent with a predicted breakdown in Japan North Korea will create major problems with Japan As this is being written Japan is moving Aegis destroyers nearer to North Korea and preparing for defense THE EVENTS DESCRIBED IN THIS BOOK AND ITS PREDECESSOR APPEAR TO BE HAPPENING AS PREDICTED LAST YEAR According to Theory of Civilizations the basis of civilizations was laid with a genetic mutation found by Ding et al 40 000 years ago that created bold enterprising individuals who became the leadership group of civilizations a group that Toynbee called the creative minority When the world s climate became warmer and more stable 10 000 years ago the seeds of civilizations began to germinate Thus the origin of civilizations is tied to human genetics The book then shows that a long term social behavior pattern of mankind based on four generation trends causes civilizations to develop and oscillate in patterns of routs and rallies Civilizations rise and fall due to their internal human dynamics The theory of civilization is developed using equations and 68 diagrams that show a close detailed match between the theory and

the actual history of all known Asian European and African civilizations over the last 5 500 years The theory projects the future of today s civilizations including the future of Western and Islamic civilizations It also successfully describes the interaction of barbarians and civilizations the interaction of two civilizations the impact of modern technology on civilizations it accounts for the Luddite reaction to the Industrial Revolution the impact of major environmental events on civilizations e g the collapse of Minoan civilization due to a volcanic eruption and the disintegration of civilizations It also accounts for the tremendous growth phases seen in many civilizations such as the building of the great pyramids in Egyptian civilizations Based on the theory fifteen new civilizations are identified including new prehistoric Chinese and Egyptian civilizations Having shown the success of the theory for earth civilizations it considers the form of extraterrestrial civilizations and calculates their impact on Western civilization should contact be established The book also shows the need for the colonization of space and nearby planets if mankind is to progress in the future The book analyzes the impact of the lengthening life spans of mankind on the future of civilizations Predictions are made for the state of the world for 2050 and 2100 A detailed understanding the past enables the theory of civilizations to make predictions for the future Defining Progress to be the sum of the world s civilizations the book shows that Progress seems to be approximately linearly increasing over the last 5 500 years A plot of Progress appears on the book s cover shown on this web page together with the contributions of each civilization to Progress The vertical order of the civilizations in the plot is arbitrary Older civilizations tend to be lower in the plot The book is a tour de force that makes History a Science rather than a collection of random events It is the first detailed mathematical treatment of history Although the book contains mathematics it is intended for the general reader as well as the mathematically inclined There are copious verbal descriptions of the theory as well as many figures plotting the theory versus historical events A qualitative descriptive theory of civilizations is also presented that is like a Dow Theory of Civilizations

The Story of Human Progress Frank Wilson Blackmar,2015-06-27 Excerpt from The Story of Human Progress A Brief History of Civilization The earnest demand for a closer study of social progress and societal relations is the reason for writing this book To attempt to understand present conditions or to advocate social reforms without an adequate conception of the elements of progress or a fair knowledge of the road over which man has traveled to reach his present position is to lead to wrong conclusions The present volume is an elementary treatise on the history of civilization especially designed for those who desire a brief survey of the whole field Such a brief survey of the progress of man must of necessity refrain from any attempt to recount the history of the tribes nations or races to which it refers but rather must dwell upon the philosophy of civilization and the judgments of history Yet within this little volume are recorded all of the principal steps of human progress and a presentation of the best results of the study of philosophy and history In order not to appear too philosophical for the purpose of the book the history of progress is approached so far as it may be from the concrete side Every branch of knowledge has its own particular charms but the story of mans progress from

a state of savagery to that of culture and learning engages the attention and arouses sympathetic interest like no other About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The Imminent Collapse of America and of the Whole Western Civilization Angelo Bertolo,2012-09-25

In the 5000 years of the history that we know great empires grew and fell according to certain patterns that repeat themselves like laws of nature The USA rose and grew to prominence in the world reached its zenith in 1945 with the military victory and with the atom bomb but is not destined to stay there forever The book tries to draw the attention to the signs of decadence that match the patterns of the decadence of previous empires in history and the patterns of growth of progress in other cultural milieus very few pundits in America and in the western media in general seem to be aware of this fact The birth rates keep diminishing in America and are very low in Europe In other civilisations the birth rates have been high and those countries count more in the world today politically and economically than a few generations ago In addition the irrational and passionate attitude of those peoples including the aggressive suicidal attitude with religious and political connotations is a sign of progress for them Those people who are in favour of family planning programs and of a more relaxed morality are acting against the general interests of their countries

A Short History of Progress Ronald Wright,2004 Each time history repeats itself so it is said the price goes up The twentieth century was a time of runaway growth in human population consumption and technology placing a colossal load on all natural systems especially earth air and water the very elements of life The most urgent questions of the twenty first century are where will this growth lead can it be consolidated or sustained and what kind of world is our present bequeathing to our future In his 1 bestseller *A Short History of Progress* Ronald Wright argues that our modern predicament is as old as civilization a 10 000 year experiment we have participated in but seldom controlled Only by understanding the patterns of triumph and disaster that humanity has repeated around the world since the Stone Age can we recognize the experiment's inherent dangers and with luck and wisdom shape its outcome
