Adult Life Judith Stevens-Long, 1979 *The Course of Life: Adulthood and the aging process*, 1981 *The Oxford Handbook of Reciprocal Adult Development and Learning* Carol Hoare, 2011-09-06 One of the Best Books of 2011 from the Center for Optimal Adult Development The fields of adult development and the study of learning have traditionally been considered separate with development falling under psychology and learning under education However recent ideas research and practices that have emerged in these fields of study effectively emphasize the inherent reciprocal relationship that exists between them advances in development frequently lead to learning and conversely learning almost necessarily fuels development In this second edition of *The Oxford Handbook of Reciprocal Adult Learning and Development* the synchronicity between development and learning is explored further as expert authors advance the latest theories to provide a rich foundation for this new area of study and practice for this interrelated field of study At the border of two disciplines this handbook focuses on the capacities of intelligence meta cognition insight self efficacy spirituality interpersonal competence wisdom and other key adult attributes as they relate to positive changes and personal growth in adults Contexts for development and learning e g the work role and environment are also addressed and mixed in throughout the volume are emanating implications for research practice and policy What emerges is a thoughtful handbook for all who promote optimal aging and is a must read for academics psychologists and practitioners in adult development *Handbook of Career Theory* Michael Bernard Arthur, Michael B. Ginsberg, 2013-10-22 *Life Span Developmental Psychology Normative Life Crises* is a compilation of papers that deals with various points of view between the academic perspective studies in developmental psychology and applied perspective and the practical efforts of social workers to help individual clients Part I discusses normative life crises from the two perspectives that include human behavior theory in social work education This part also includes an interdisciplinary approach covering developmental social sociological economic and psychological fields Part II covers the normative life crises in individual development such as discussions on death ego development and a practitioner's response on models of ego development The book also discusses an abstract model versus an actual individual experience in dealing with crises as well as the meanings of adaptation and survival during old age Part III presents the normative life crises in the family circle covering topics such as parenthood sex roles depression widowhood and an example of situational stress Part IV deals with the normative life crises and the social system including socialization life course changing work cycles and public policy on death This book will prove valuable for psychologists psychiatrists sociologists social workers and behavioral scientists *Child and Adult Development* Calvin A. Colarusso, 2013-11-21 Developmental theory is the essence of any psychodynamic psychotherapy and certainly of

psychoanalysis It is through an understanding of progressive life events and the way these events relate to associated biological and social events that we come to understand both psycho pathology and psychological strengths For a long time we have needed a clinically oriented book that surveys normal development in both childhood and adulthood This book should be particularly helpful to all mental health professionals whose daily work requires a constant awareness and appraisal of developmental issues Dr Colarusso has integrated and summarized a tremendous amount of theoretical empirical and clinical material in a format that makes it come alive through clinical examples This book should be of great interest to all students of human behavior as well as to seasoned clinicians
