V Gordon Childe was the first scholar to attempt a broad and sustained socioeconomic analysis of the archaeology of the ancient world in terms that today could be called explanatory To most he was remembered only as a diligent synthesizer whose whole interpretation collapsed when its chronology was demolished There was little recognition of his insistence that the emergence of craft specialists and their very variable roles in the relations of production were crucial to an understanding of social evolution The interrelationship between sociopolitical complexity and craft production is a critical one so critical that one might ask just how complex would any society have become without craft specialization This volume derives from the papers presented at a symposium at the American Anthropological Association meetings on the centenary of Childe s birth Contributors to the volume include David W Anthony Philip J Arnold III Bennet Bronson Robert Chapman John E Clark Cathy L Costin Pam J Crabtree Philip L Kohl D Blair Gibson Antonio Gilman Vincent C Piggott Jeremy A Sabloff Gil J Stein Ruth Tringham Anne P Underhill Bernard Wailes Peter S Wells Joyce C White Rita P Wright and Richard L Zettler Symposium Series Volume VI University Museum Monograph 93
